Data explorer

In the data explorer section, detailed information on renewable energy projects in Arab countries can be accessed. The frequently-updated section also contains information for RE projects such as name, location, current operational status, capacity, etc

Analysis

Taqaway's Analysis section provides users with various interactive tools to analyze renewable energy and energy efficiency data in the Arab region. These tools provide interactive charts and graphics, countries and statistics comparisons, as well as time-series analysis

ARAB FUTURE ENERGY INDEX

This section is the online version of RCREEE's flagship publication, the Arab Future Energy Index™ (AFEX) which is the first native Arab benchmarking index dedicated to monitoring and analyzing sustainable energy competitiveness in the Arab region. AFEX offers both quantitative and qualitative analysis for key renewable energy and energy efficiency markets

Arab Sustainable Energy Portal

The TaqaWay knowledge portal is a joint collaborative initiative between the League of Arab States (LAS) and the Regional Center for Renewable Energy and Energy Efficiency (RCREEE). It provides a central collaboration and monitoring platform that helps sustainable energy studies across the region. It also showcases projects, initiatives, field experts, energy prices, and other field-relevant information.

This Portal is intended to help policy makers, non-governmental institutions, investors, academia, field experts, and researchers to find the reliable, accurate and updated information on sustainable energy in the Arab region. TaqaWay has been developed with additional kind support of UN-ESCWA and UNEP.
